What TheWell offers users

A simple way to access useful content from local devices.

- Access media and learning resources without constant internet.
- Use a local TheWell Box connection from a phone, tablet, or laptop.
- Open TheWell Portal in a browser and browse available content.
- Discover both organization-specific content and public collections.

Why this matters

For users, TheWell should feel simple: connect, open, browse, and use content.

Typical use cases

- Self-learning
- Group learning
- Community access
- Exploring new content resources

How users access TheWell

The basic access journey is short and practical.

- 1 Connect to the box**
Join the Wi-Fi network provided by TheWell Box from a phone, tablet, or laptop.
- 2 Open the portal**
Use a browser to go to <http://thewell.box>.
- 3 Use shortcuts if available**
Some users may connect more easily through QR codes or a saved app-like shortcut.
- 4 Start browsing**
Open the available content areas and begin using the collections.

Browsing and using collections

What end users do once they are inside the portal.

- Browse the available content collections.
- Choose content that matches learning, media, or community needs.
- Open media or learning resources directly on the device.
- Return easily later if the portal was saved as a shortcut.
- Use what is available locally without depending on full-time internet access.

User experience goal

The system should make access feel immediate and understandable, even for users with limited technical confidence.

Device flexibility

Users can access content from mobile phones, tablets, laptops, and similar personal devices.
